

Python: Working With Scientific Data

Shaun Walbridge

Kevin Butler

<https://github.com/scw/scipy-devsummit-2015-talk>

[Handout PDF](#)

[High Quality PDF \(57MB\)](#)

Python

Why Python?

- Accessible for new-comers, and the [most taught first language in US universities](#)
- Extensive package collection (56 thousand on [PyPI](#)), broad user-base
- Strong glue language used to bind together many environments, both open source and commercial
- Open source with liberal license — do what you want

. . .

- Brand new to Python? This talk may be challenging
- Resources include materials that for getting started

Release History

- ArcGIS 9.0 (2004, Python 2.1)
 - PythonWin COM bindings

```
import win32com
gp = win32com.client.Dispatch("esriGeoProcessing.GpDispatch.1")
```

- ArcGIS 9.2 (2006, Python 2.4)

- NumPy 1.0.3
- Python-native module

```
import arcgisscripting
gp = arcgisscripting.create()
```

Release History

- ArcGIS 9.3 (2008, Python 2.5.1)

- Python GP on Server
- `gp = arcgisscripting.create(9.3)`

- ArcGIS 10.0 (2010, Python 2.6)

- Fully integrated module: `import arcpy`
- Python window
- New extensions:
 - * `arcpy.sa`
 - * `arcpy.mapping`
 - * `arcpy.ga`

Release History

- ArcGIS 10.1 (2012, Python 2.7)

- Fast cursors: `arcpy.da.*`
- Python Add-Ins and Python Toolboxes
- Background Geoprocessing (64-bit)
- matplotlib

- ArcGIS 10.3 (2014, Python 2.7.8)

- Python 3.4 in Pro

- NetCDF4
- [Python raster function](#), with a [repository of examples](#) using SciPy for on the fly visualizations

Release History

- Next:
 - SciPy stack
 - Package Management Environment (pip + the hard stuff)
 - Integration with R statistical language
- Move toward maintainable, reusable code and beyond the “one-off”

SciPy

Why SciPy?

- Most languages don’t support things useful for science, e.g.:
 - Vector primitives
 - Complex numbers
 - Statistics
- Object oriented programming isn’t always the right paradigm for analysis applications, but is the only way to go in many modern languages
- SciPy brings the pieces that matter for scientific problems to Python

Included SciPy

Package	KLOC	Contributors	Stars
matplotlib	63	312	2313
Nose	7	64	744
NumPy	84	299	1804
Pandas	112	349	4115

Package	KLOC	Contributors	Stars
SciPy	91	265	1528
SymPy	223	340	1981
Totals	580	1369	

1. An array object of arbitrary homogeneous items
2. Fast mathematical operations over arrays
3. Linear Algebra, Fourier Transforms, Random Number Generation

0	1	2	3	4	5
10	11	12	13	14	15
20	21	22	23	24	25
30	31	32	33	34	35
40	41	42	43	44	45
50	51	52	53	54	55

Figure 1:

[SciPy Lectures](#), CC-BY

ArcGIS + NumPy

- ArcGIS and NumPy can interoperate on raster, table, and feature data.
- See [Working with NumPy in ArcGIS](#)
- In-memory data model. Example script to [process by blocks](#) if working with larger data.

ArcGIS + NumPy

Figure 2:

- Plotting library and API for NumPy data

Computational methods for:

- Integration ([scipy.integrate](#))
- Optimization ([scipy.optimize](#))
- Interpolation ([scipy.interpolate](#))
- Fourier Transforms ([scipy.fftpack](#))
- Signal Processing ([scipy.signal](#))
- Linear Algebra ([scipy.linalg](#))

Figure 3:

- Spatial ([scipy.spatial](#))
- Statistics ([scipy.stats](#))
- Multidimensional image processing ([scipy.ndimage](#))

Spatial is the tools across all of the domains of science, very general.

That said, can be useful in a variety of circumstances, e.g. KDTree for finding data quickly.

SciPy: Geometric Mean

- Calculating a geometric mean of an *entire raster* using SciPy ([source](#))

$$\left(\prod_{i=1}^n a_i\right)^{1/n} = \sqrt[n]{a_1 \cdot a_2 \cdots a_n}$$

Figure 4:

```
import scipy.stats
rast_in = 'data/input_raster.tif'
rast_as_numpy_array = arcpy.RasterToNumPyArray(rast_in)
raster_geometric_mean = scipy.stats.stats.gmean(
    rast_as_numpy_array, axis=None)
```

([Inspiration](#))

- **Panel Data** — like R “data frames”
- Bring a robust data *analysis* workflow to Python

([Source](#))

```
import pandas

data = pandas.read_csv('data/season-ratings.csv')
data.columns

Index([u'season', u'households', u'rank', u'tv_households', \
      u'net_indep', u'primetime_pct'], dtype='object')
```

```
majority_simpsons = data[data.primetime_pct > 50]
```

	season	households	tv_households	net_indep	primetime_pct
0	1	13.4m[41]	92.1	51.6	80.751174
1	2	12.2m[n2]	92.1	50.4	78.504673
2	3	12.0m[n3]	92.1	48.4	76.582278
3	4	12.1m[48]	93.1	46.2	72.755906
4	5	10.5m[n4]	93.1	46.5	72.093023
5	6	9.0m[50]	95.4	46.1	71.032357
6	7	8.0m[51]	95.9	46.6	70.713202
7	8	8.6m[52]	97.0	44.2	67.584098
8	9	9.1m[53]	98.0	42.3	64.383562
9	10	7.9m[54]	99.4	39.9	60.916031
10	11	8.2m[55]	100.8	38.1	57.466063
11	12	14.7m[56]	102.2	36.8	53.958944
12	13	12.4m[57]	105.5	35.0	51.094891

- A Computer Algebra System (CAS), solve math equations ([source](#))

```
from sympy import *
x = symbol('x')
eq = Eq(x**3 + 2*x**2 + 4*x + 8, 0)

solve(eq, x)
```

$$x^3 + 2x^2 + 4x + 8 = 0$$

Figure 5:

$$\left[-2, \quad -2i, \quad 2i \right]$$

Figure 6:

Where Can I Run This?

- Now:
 - ArcGIS Pro (64-bit) “Standalone Python Install for Pro”
 - * Ships most of [Scipy Stack](#) (missing IPython)
 - NumPy: ArcGIS 9.2+, matplotlib: ArcGIS 10.1+
- Upcoming:
 - ArcGIS Desktop (32-bit), Background Geoprocessing (64-bit), Server (64-bit), Engine (32-bit)
 - IPython Included

Multidimensional Data

NetCDF4

- Fast, HDF5 and NetCDF4 read+write support, OPeNDAP
- Hierarchical data structures
- Widely used in meteorology, oceanography, climate communities
- Easier: Multidimensional Toolbox, but can be useful

([Source](#))

```
import netCDF4
nc = netCDF4.Dataset('test.nc', 'r', format='NETCDF4')
```

```
print nc.file_format
# outputs: NETCDF4
nc.close()
```

- CF compliant data
- Fast, C-based access

Multi-D Improvements

- Multidimensional formats: HDF, GRIB, NetCDF
- Access via OPeNDAP, vector renderer, Raster Function Chaining
- [An example which combines multi-D with time](#)
- Multi-D supported as WMS, and in Mosaic datasets (10.2.1+)

Demo: Benthic Terrain Modeler

Benthic Terrain Modeler

- A Python Add-in and Python toolbox for geomorphology
- Open source, can borrow code for your own projects: <https://github.com/EsriOceans/btm>
- Active community of users, primarily marine scientists, but also useful for other applications

Lightweight SciPy Integration

- Using `scipy.ndimage` to perform basic multiscale analysis
- Using `scipy.stats` to compute circular statistics

Lightweight SciPy Integration

[Example source](#)

```

import arcpy
import scipy.ndimage as nd
from matplotlib import pyplot as plt

ras = "data/input_raster.tif"
r = arcpy.RasterToNumPyArray(ras, "", 200, 200, 0)

fig = plt.figure(figsize=(10, 10))

```

Lightweight SciPy Integration

```

for i in xrange(25):
    size = (i+1) * 3
    print "running {}".format(size)
    med = nd.median_filter(r, size)

    a = fig.add_subplot(5, 5, i+1)
    plt.imshow(med, interpolation='nearest')
    a.set_title('{}x{}'.format(size, size))
    plt.axis('off')
    plt.subplots_adjust(hspace = 0.1)
    prev = med

plt.savefig("btm-scale-compare.png", bbox_inches='tight')

```

.

SciPy Statistics

- Break down aspect into $\sin()$ and $\cos()$ variables
- Aspect is a circular variable — without this 0 and 360 are opposites instead of being the same value

SciPy Statistics

Summary statistics from SciPy include circular statistics ([source](#)).

Figure 7:

```
import scipy.stats.morestats

ras = "data/aspect_raster.tif"
r = arcpy.RasterToNumPyArray(ras)

morestats.circmean(r)
morestats.circstd(r)
morestats.circvar(r)
```

Testing with Nose

- [Nose](#) — a Python framework for testing
- Tests improve your productivity, and create robust code
- Nose builds on unittest framework, extends it to make testing easy.
- Plugin architecture, [includes a number of plugins](#) and can be extended with [third-party plugins](#).

Testing with Nose

An example test from testMain.py ([full code](#), [example](#)):

```
class TestBpi(unittest.TestCase):
    def testBpiRun(self):
        input_raster = 'data/input_raster.tif'
        output_raster = 'test_run_bpi.tif'
        bpi.main(input_raster, 10, 30, output_raster)

        # Does our raster match the known mean?
        self.assertAlmostEqual(
            utils.raster_properties(output_raster, "MEAN"),
            0.295664335664)
```

Testing with Nose

Test specific BTM script:

```
cd tests/
nosetests -s testMain:TestBpi
```

Output:

```
-----
2 tests run in 7.1 seconds (2 tests passed)
-----
```

```
Ran 2 tests in 4.217s
```

OK

Testing with Nose

Supports many more options, and can integrate with tools like [coverage](#) to give you information about testing coverage, or the amount of code that you've added tests for, and what lines of code are missing from your tests:

```
nosetests --with-coverage
```

Testing with Nose

Coverage results:

Name	Stmts	Miss	Cover	Missing
scripts.aspect	24	4	83%	48-49, 53-54
scripts.bpi	24	4	83%	57-58, 62-63
scripts.btm_model	39	4	90%	83-85, 89-90
scripts.classify	90	20	78%	23, 30, 115-142
scripts.config	4	0	100%	
scripts.depth_statistics	39	4	90%	67-68, 72-73
scripts.ruggedness	49	4	92%	96-97, 101-102
scripts.slope	18	4	78%	41-42, 46-47
scripts.standardize_bpi_grids	28	4	86%	57-58, 62-63

scripts.surface_to_planar	100	9	91%	179-180, 188-198
scripts.utils	229	38	83%	37-51, 57-86

TOTAL	644	95	85	

45 tests run in 316.5 seconds (45 tests passed)

Ran 45 tests in 316.091s

OK

from future import *

Opening Doors

- Machine learning (scikit-learn, scikit-image, ...)
- Deep learning (theano, ...)
- Bayesian statistics ([PyMC](#), ...)
- Markov Chain Monte Carlo (MCMC)
- Frequentist statistics (statsmodels)

Resources

Other Sessions

- Python Raster Function: Custom On-the-fly Analysis
- Python: Working with Raster Data
- Python: Developing Geoprocessing Tools
- Integrating Open-source Statistical Packages with ArcGIS
- ArcGIS Pro: Map Automation with Python

New to Python

- Courses:
 - [Programming for Everybody](#)
 - [Codecademy: Python Track](#)
- Books:
 - [Learn Python the Hard Way](#)
 - [How to Think Like a Computer Scientist](#)

GIS Focused

- [Python Scripting for ArcGIS](#)
- [ArcPy and ArcGIS - Geospatial Analysis with Python](#)
- [Python Developers GeoNet Community](#)
- [GIS Stackexchange](#)

Scientific

Courses:

- [Python Scientific Lecture Notes](#)
- [High Performance Scientific Computing](#)
- [Coding the Matrix: Linear Algebra through Computer Science Applications](#)
- [The Data Scientist's Toolbox](#)

Scientific

Books:

- Free:
 - [Probabilistic Programming & Bayesian Methods for Hackers](#)
 - * very compelling book on Bayesian methods in Python, uses SciPy + PyMC.
 - [Kalman and Bayesian Filters in Python](#)

Scientific

- Paid:
 - [Coding the Matrix](#)
 - * How to use linear algebra and Python to solve amazing problems.
 - [Python for Data Analysis: Data Wrangling with Pandas, NumPy, and IPython](#)
 - * The canonical book on Pandas and analysis.

Packages

Only require SciPy Stack:

- Scikit-learn:
 - [Lecture material](#)
 - Includes SVMs, can use those for image processing among other things...
- FilterPy, Kalman filtering and optimal estimation:
 - [FilterPy on GitHub](#)
- [An extensive list of machine learning packages](#)

Code

- [ArcPy + SciPy on Github](#)
- [raster-functions](#)
 - An open source collection of function chains to show how to do complex things using NumPy + scipy on the fly for visualization purposes
- [statistics library](#) with a handful of descriptive statistics included in Python 3.4.
- *TIP*: Want a codebase that runs in Python 2 and 3? [Check out future](#), which helps maintain a single codebase that supports both. Includes the `futurize` script to initially a project written for one version.

Scientific ArcGIS Extensions

- [Movement Ecology Tools for ArcGIS \(ArcMET\)](#)
- [Marine Geospatial Ecology Tools \(MGET\)](#)
 - Combines Python, R, and MATLAB to solve a wide variety of problems
- [SDMToolbox](#)
 - species distribution & maximum entropy models
- [Benthic Terrain Modeler](#)
- [Geospatial Modeling Environment](#)
- [CircuitScape](#)

Conferences

- [PyCon](#)
 - The largest gathering of Pythonistas in the world
- [SciPy](#)
 - A meeting of Scientific Python users from all walks
- [PyVideo](#)
 - Talks from Python conferences around the world available freely online.
 - [PyVideo GIS talks](#)

Closing

Thanks

- Geoprocessing Team
- The many amazing contributors to the projects demonstrated here.
 - Get involved! All are on GitHub and happily accept contributions.
